Only the BEST Will Do!

Here at InCare, we specialize in finding and selling the BEST technology available. Because we ONLY sell the BEST, it keeps us focused on specific products and solutions. This helps us ensure the customer has a comprehensive and complete experience!

COVID-19 SHOULD NOT STAND IN THE WAY OF LEARNING!

Here are some of the BEST tools we have found to help teachers get through the COVID-19 pandemic, but

that will also go the long haul and enhance teaching and learning when we reach a day of “normalcy,” and that day will come!

ViewSonic IFP50 Series

First, there is the [ViewSonic IFP50](#) series interactive display. Whether students are in class, at home, or both, this display is one of the best in the market, and what makes it our ONLY choice for an interactive touch panel is price, durability, warranty, and software. Built solid, priced so schools can afford it, loooong warranties you get at no charge, and it's a winner! How can these extra warranties come at no charge? Simple. Because they are rarely **ever** needed. Finally, the myViewBoard suite of software and learning resources comes at no charge, no licensing fees, no hassle, ever...AND we TRAIN for free. Sizes ranging from 55" to 98" fit anyone's wall AND their budget. Starting around \$1,800.00. Check out these: [IPF50 Series](#), [IFP from InCare](#), [myViewBoard for Windows](#).

myViewBoard for Windows

Be sure you are using your ViewSonic Panel to its fullest capabilities with myViewBoard for Windows. Best part? The software is free. Screen record and live

stream. Import from Cloud Services. Translate in over 50 languages. Embed Video and image files. [CLICK HERE](#) for Tips and Tricks!

One Teacher on Their Feet is Better than TWO in the Seat!

Untether your teachers from their laptops during e-learning with one of many distance learning solutions from

ViewSonic and Poly. [CLICK HERE](#) for more information!

Interested in School Security?

[Digital Watchdog \(DW®\)](#) is the industry leader in

digital recorders, surveillance cameras and related management software, delivering complete video surveillance solutions for HD over Coax and HD IP systems of any size and for any application.

Poly Studio USB Webcam

Pair your interactive display with a [Poly Studio USB](#) camera, and you have your own “teaching studio.” The Poly Studio USB is a plug and play web camera that works with your choice of conferencing software, but it also has advanced features allowing it to operate like a portable “film studio.” Presenter tracking flawlessly follows the teacher around the room with a 4K camera and 5x's Zoom with no special lanyard or device needed. The Studio has automatic face and voice detection. Noise suppression and acoustic fencing both eliminate distracting noises by suppressing unwanted noises (keyboards for instance) and creating a virtual “fence” where nothing outside the teacher's range of motion is heard! Did we mention this is totally portable and has a remote? \$787.00

ViewSonic TD1655 Touch Screen Display (16”)

Teaching is a difficult job, but what makes it more difficult is remote learning with only a mouse (desktop) or trackpad (laptop) to annotate! It's virtually impossible for teachers to do what feels

natural and “write on the board” when they have only their computer and no access to an interactive panel or touch screen. This happens more often when they are not in the classroom, a common event during COVID-19. We have the solution, AND it's portable! At 16”, the 16:9 [ViewSonic TD1655](#) touch display makes any Windows laptop or desktop a touch screen...but it also

works with Chromebooks/boxes, too! At around \$240, any old monitor should be replaced, no matter if not for virtual learning! Need a larger size? There is a [TD2455](#), as well!

REMOTE LEARNING IS DIFFICULT WITH ONLY A MOUSE (DESKTOP) OR TRACKPAD (LAPTOP) TO ANNOTATE!

Epson DC-07 HD Document Camera - Focusing on the Details

To complete your classroom or portable distance learning solution, pair a high quality [DC-07 document camera](#) with your PC and the myViewBoard for Windows software from ViewSonic (remember, the software is free!).

The camera makes viewing 3D objects or

experiments easy with 1080p resolution and up to 8x's zoom. This camera can also record your experiment at 15 frames per second, and has a built in mic. Finally, it is USB Powered from your device. Use this during your class or online teaching to focus on important objects, details, and documents. \$175.00
